## oval frame

Elegant internal glass doors which consist of a detachable, adaptive oval shaped aluminum profile, serving as the door's frame and capable of embracing walls from 7cm up to 12.5cm in thickness and from 12.5cm up to 18cm in width.

Minimal, adaptive design, unlimited color and design combinations, enable you to create a door exactly as you imagined it, in either domestic or professional spaces.

The perimetric profile comes with barring rubbers, while glass doors are made of tempered glass, 8mm to 12mm in thickness, and come with specially designed heavy type components.

Matching aluminum profiles for fixed windows are also available, as part of a more uniform design solution for your space.
